Plaza Paver Vendor Addition to Service Western States and Provinces

October 15, 2019

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce the addition of the Westile® Western Plaza Paver™ Series to its product lineup. Western Plaza Pavers are available exclusively for projects located in the western United States and Canada, including the following states and provinces:

United States	Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming
Canada	British Columbia, Alberta, Saskatchewan

Because they are manufactured within the western region, Westile's Western Series Plaza Pavers will allow Carlisle to be much more competitive for projects in those markets by reducing shipping costs.

With the ever-increasing demand for rooftop amenity space, it is important that Carlisle's product offering meets customers' needs. Carlisle offers a full line of Roof Garden and Plaza Paver products to meet virtually any roof design. As a reminder, if the building owner wishes to obtain a Carlisle Total System Warranty, all Roof Garden and Plaza Paver components must be purchased through and supplied by Carlisle.

For more information about Westile Western Plaza Pavers, contact your manufacturer's representative.
