

CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

EPDM-2011-14 Tape Requirement for Warranties July 25, 2011

TO: Carlisle Authorized Applicators

Current regulations in the Ozone Transportation Commission (OTC) states will eliminate the ability to use non-compliant VOC products such as Sure-Seal® EP-95 and Sure-White® splicing cements beginning January 1, 2012

Based on the OTC states' regulations and the demand for longer-term warranties, Carlisle will no longer allow adhesive splices for any warranted roof projects as of December 31, 2011. Beginning January 1, 2012 contractors must use either SecurTape™ or Factory-Applied Tape (FAT™) to receive a warranty for Carlisle's EPDM roofing systems regardless of the warranty term.

Listed below are the tape products required for inclusion in Carlisle's warranties:

5-, 10- and 15-Year Warranties

300465 – Sure-Seal 3" SecurTape
303260 – Sure-White 3" SecurTape
Minimum of 3" FAT

20-Year Warranties

302952 – Sure-Seal 6" SecurTape
317501 – Sure-White 6" SecurTape
Minimum of 3" FAT

25- and 30-year Warranties

302952 – Sure-Seal 6" SecurTape
317501 – Sure-White 6" SecurTape
Minimum of 6" FAT

If you have any questions regarding these changes, please contact your local Carlisle manufacturer's representative or distributor.

Sincerely,

Eric Pushart
EPDM Technical Specialist
Carlisle SynTec
