

# CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

**TPO-2015-06**  
**Sure-Weld® TPO Contour Rib™ Profile**  
April 22, 2015

## To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce its new Sure-Weld® TPO Contour Rib™ Profile. This innovative product combines the advantages of a single-ply system with the aesthetic appeal of a standing-seam metal roof. To achieve this look, Carlisle's TPO Contour Rib Profile is hot-air welded in a parallel pattern to the exposed surface of FleeceBACK® TPO membrane.

Designed to cast a distinctive shadow that can be seen from the ground or surrounding areas, Carlisle's TPO Contour Rib Profile provides enhanced aesthetics when compared to other TPO rib profiles. This product is extruded from the same weather-resistant TPO compound as Carlisle's Sure-Weld TPO roofing membrane, ensuring comparable weathering characteristics and an excellent color match.

Carlisle's durable TPO Contour Rib Profile is dimensionally stabilized and strengthened by a 1/8" fiberglass reinforcing cord that runs the length of each section. During installation, the Contour Rib Profile sections are joined together by a non-corroding, fiberglass pin, ensuring compatibility and continuity throughout the application.

Carlisle's TPO Contour Rib Profile is available in white, gray and tan and measures 10' long, 1 1/4" tall, and 2 1/16" wide (including the welding flanges). The vertical profile is a substantial 3/8" thick, and each section of TPO Contour Rib Profile has a 1/8" alignment hole. This product is packaged 20 pieces per carton; each carton includes 25 connecting pins.

Product Description	Packaging	Part Number
CONTOUR RIB PROFILE - WHITE	20 Lengths/CTN	324574
CONTOUR RIB PROFILE - GRAY	20 Lengths/CTN	324572
CONTOUR RIB PROFILE - TAN	20 Lengths/CTN	324573
