PVC-2020-10
Yellow Pressure-Sensitive Warning Strip for Sure-Flex™ PVC
June 18, 2020

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce its productivity-boosting 6" x 100' Yellow Pressure-Sensitive (PS) Warning Strip for use on Sure-Flex PVC and KEE HP membranes. This pressure-sensitive product eliminates the need for welding equipment, generators, and extension cords; and uses the same Low-VOC PVC Step 1 Activator and Step 2 Primer as Carlisle's PVC PS Cover Strip.

The highly visible, bright yellow warning strip is easy to apply and is ideal for rooftops that receive frequent visits from maintenance personnel. It provides a permanent visual warning of roof edges and other impending hazards such as penetrations, drain sumps, low horizontal pipes, and skylights.

Product Code	Description	Unit	FT2/Roll	Wt./Pkg. Unit	Stk. Loc.
