MA-2020-14
Sure-Flex™ PVC Slate Gray Polyester-Reinforced Membrane
August 26, 2020

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce its new Slate Gray Polyester-Reinforced PVC and FleeceBACK® PVC membranes and accessories. Manufactured in Greenville, Illinois, Carlisle's Slate Gray products are darker in color for highly visible or sloped roofs, as well as northern roofs that benefit from the warming capabilities of a darker color in the winter season. Slate Gray can also hide dirt accumulation.

Polyester-reinforced membranes can be adhered or mechanically fastened and offer better tear strength, breaking strength, and puncture resistance than fiberglass-reinforced membranes. Carlisle's Slate Gray Polyester-Reinforced PVC meets or exceeds all requirements of Type III and Type IV per ASTM D4434 Standard Specification for Polyvinyl Chloride Sheet Roofing.

Along with the non-reinforced flashing material for making your own accessories, custom accessories are also available in Slate Gray. Use the TPO and PVC Custom Accessory Quote Request form.

Warranty coverages for slate gray PVC membranes are available up to 20-years.

Product Code	Description	Unit	FT2/Roll	Wt./Pkg. Unit	Stocking Locations
335754	.060 Rein. Slate Gray PVC 10' X 100'	FT2	1000	448	C
