

# MARKETING ANNOUNCEMENT

Authorized Applicator

## MA-2020-18 Container Recycling Program Update September 25, 2020

### To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to announce it is collaborating with Clean Earth to help reduce landfill waste generated from the commercial roofing industry. Carlisle is dedicated to sustainability in all facets of its business, including product packaging. This partnership with Clean Earth will help Carlisle's customers save money while improving the long-term health of our planet.

Clean Earth is one of the largest specialty waste companies in the United States, providing remediation, disposal, recycling, and beneficial reuse solutions for hazardous and non-hazardous waste. Its vast portfolio of technologies and services touches nearly every industry that generates waste, including energy, infrastructure, commercial, industrial, retail, and healthcare markets.

This cost-effective and eco-friendly program allows Carlisle Authorized Applicators to send empty CAV-GRIP® III and CAV-GRIP PVC cylinders, Flexible FAST™ Dual Tanks, and Flexible FAST 15- and 50-gallon drums to a Clean Earth facility for recycling. Once the containers have been received by Clean Earth, they will properly break down all components and source the waste streams back out for use in other business sectors. A minimum quantity is required for each shipment. There are no maximum quantity limits.

Packaging Type	Minimum Quantity
CAV-GRIP III or CAV-GRIP PVC	12 canisters (#40 cylinders only)
Flexible FAST Dual Tanks	12 canisters
Flexible FAST 15-Gallon Drums	9 drums
Flexible FAST 50-Gallon Drums	4 drums

\*Large (#85) cylinders of CAV-GRIP III do not qualify for this program and should be recycled by following the procedure described on the cylinder sticker.

By opting into this program, applicators can save on landfill and dumpster expenses while helping to reduce the roofing industry's environmental footprint. For more information, please refer to the Container Recycling Program guide on the Carlisle SynTec website or contact Eric Holland at [Eric.Holland@CarlisleCCM.com](mailto:Eric.Holland@CarlisleCCM.com).

Sincerely,

Eric Holland
