

CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

ID-2017-02

**Induction-Welded Systems Update
March 21, 2017**

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems' Sure-Weld® TPO, Sure-Flex™ PVC, and Sure-Flex KEE HP specifications and details have been updated to include the isoweld® Induction Welding System and are now available on the Carlisle website.

Carlisle isoweld plates are available in both TPO and PVC/KEE HP versions and will ship directly from a third-party supplier. Please note: isoweld plates must be purchased through Carlisle to be eligible for warranty coverage and must only be installed using the isoweld induction welding tool. More information about the isoweld system is available on the Carlisle website.

<u>isoweld Plates</u>		
Product Code	Description	Pieces per Carton
325910	3" TPO isoweld Insulation Plate	500
329461	3" PVC isoweld Insulation Plate	500

In addition, cardboard protection discs must be used when installing either the RhinoBond® or isoweld plates over approved EPS insulation. One cardboard disc is required for each plate.

<u>Cardboard Discs</u>		
Product Code	Description	Pieces per Carton
329291	RhinoBond Cardboard Disc	2,000
329292	isoweld Cardboard Disc	250

If you have any questions, or for more information, please contact your Carlisle Manufacturer's Representative.

Sincerely,

Adam Burzynski
