Authorized Applicator

SureTite™ Galvanized Cleat Program March 2, 2022

To: Carlisle SynTec Systems' Authorized Applicators

Carlisle SynTec Systems is pleased to introduce its SureTite Galvanized Cleat Program, which will allow customers to receive an ES-1 approved cleat on the same truck as membrane and accessory orders. The newest addition to Carlisle's expansive metal program makes it easy for contractors to dry-in the roofing system by terminating the edge of the roof during the initial installation. When the SureTite Galvanized Cleat is combined with a properly fabricated face covering made from Carlisle Kynar® Flat Sheets, contractors can achieve an ES-1 approved assembly.

There are two SureTite cleat designs: snap-on fascia and drip edge. Both designs come in four different sizes and there are five finished edge designs. With the snap-on fascia cleat, contractors can complete a snap-on fascia or sloped coping edge system. Using the drip edge, contractors can complete a drip edge, gravel stop, or flat coping edge system.

SureTite Galvanized Cleat Program Benefits:

- SureTite Galvanized Cleats will be stocked in Carlisle, PA, and Tooele, UT
- Distributors can order full pallet quantities to stock in their warehouse
- Cleats can be delivered with roofing package, making it convenient to quickly dry-in the roof system
- When using Carlisle's prefabricated cleats and flat sheets, Carlisle will share the ES-1 certification for the project if the cover is fabricated to Carlisle's specifications, and the roof edge system will be covered under Carlisle's Total System Warranty
- A 72 MPH wind speed warranty will be available for contractors who are not ES-1 certified through Carlisle
- An 80 MPH wind speed warranty will be available for contractors who are ES-1 certified through Carlisle

It's simple for contractors to achieve an ES-1 certified edge that is covered under Carlisle's warranty.

- Choose "Prefabricated Cleat and Carlisle Kynar Flat Sheet" when filling out your NOA
- Purchase the SureTite Cleat of your choice
- Install the cleat and bend your face cover to Carlisle's specifications, using Carlisle-branded Kynar Flat Sheets
- Complete the NOC and upload your invoice for the materials
- Your edge is ES-1 certified and included in the roof system warranty

SureTite Galvanized Cleats come in 12' lengths with 10 pieces to a bundle. For shipments going directly to jobsites, Carlisle will allow bundle quantities to be top-loaded with the roofing materials. Distributors must order full pallet quantities.

SureTite Galvanized Cleat Program Product Offering				
Product Code	Product Description	Length/Piece	Pieces/Carton	Bundles/Pallet
349032	SureTite 3" Drip Edge	12'	10	40
