

Is Your Roof Losing Energy?

RoofSense® is an online energy cost savings calculator created to demonstrate the benefits of additional insulation in a roof system. The tool is designed to help building owners understand the long-term savings associated with high-performance roof insulation. RoofSense generates a concise report assisting building stakeholders in understanding the ROI of insulation immediately. Using energy modeling to estimate annual cost savings, RoofSense provides an in-depth comparison of thermal energy loss and illustrates the value of a high-performance roof system.

Contact your local Carlisle manufacturer's representative for a free RoofSense analysis, or visit www.roofsense.net.

FEATURES AND BENEFITS

The new and improved RoofSense report provides:

- » Industry standard U.S. DOE, Oak Ridge National Laboratory, and ASHRAE background data
- » Demonstration of heating and cooling degree days
- » A comprehensive, easy-to-understand, single-page report
- » Ability to compare up to four roof assemblies simultaneously
- » Total life-cycle savings over the lifespan of the roof
- » Heating and cooling cost savings analysis.
