

Extended Panel Advantage for Tapered Polyiso Systems

MONEY IN YOUR POCKET

- » Reduces Labor and Handling
- » Reduces "Fill" Panels
- » Reduces Applications of Adhesives or Hot Asphalt

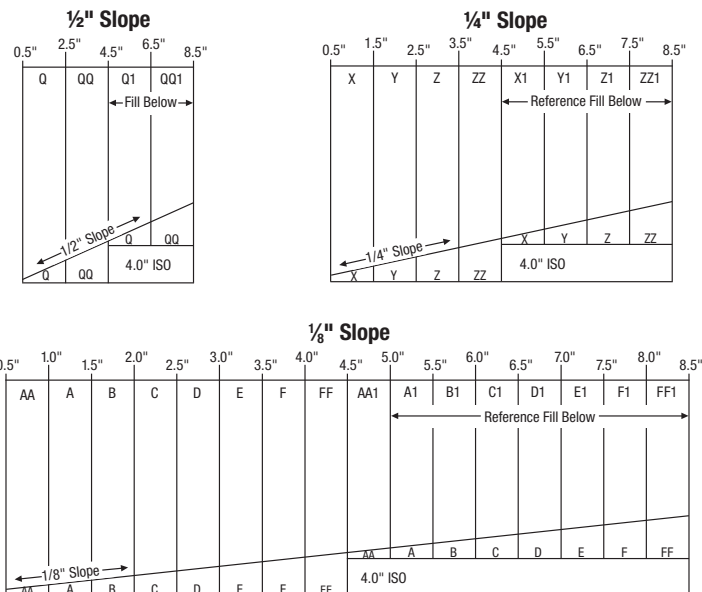

PRODUCTS

- » InsulBase® Tapered Polyiso
- » SecurShield® Tapered Polyiso – premium-performance coated fiberglass facer
- » D, E, F, FF, Z, ZZ and QQ are the extended panels and are also available in Pre-cut Hips and Valleys – reduce waste
- » Hinged Target Sump® – Hinged 8' x 8' Sump, pre-assembled in one piece

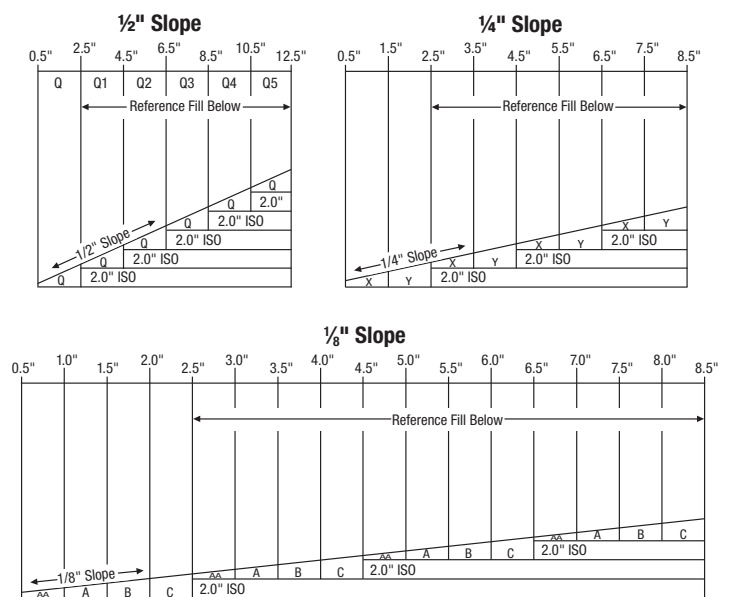

SYSTEM FEATURES AND BENEFITS INCLUDE:

- » Single-source responsibility – tapered design by Carlisle
- » More design options to fit your budget and building requirements
- » Fewer squares of applied material
- » Less adhesives required
- » All boards are standard – no custom orders

Extended Panel Profiles

Standard Panel Profiles

PROJECT SPECIFICATIONS

Roof Area 401 squares
Tapered Insulation Slope 1/4" per foot
1/2" minimum at drains – 12 1/2" high point

Standard Panel System:
 Standard Panel Repeat: X, Y, Z"
 2" Fill Required – 614 squares
Standard Cost: \$64,875

Extended Panel System:
 Extended Panel Repeat: X, Y, Z, ZZ, 4"
 4" Fill Required – 206 squares
Extended Cost: \$72,800

The Extended Panels System results in 408 fewer squares of applied materials, which equals a savings of \$16,320* in adhesive and labor costs.

Total project savings equals \$8,395.

*Adhesive and labor costs calculated at \$40 per square.
