

CARLISLE CAPITAL INVESTMENTS

IN THIS ISSUE

- P1 PVC Line Producing Material
- P2 Grand Opening Date Announced for PVC Line
- P2 Update on Carlisle's Fifth TPO Line

For more than 50 years, innovation has been at the forefront of Carlisle Construction Materials' business model. Decades of manufacturing experience and industry insight have given Carlisle a unique understanding of which products and services are most important to specifiers, contractors and building owners.

Carlisle's commitment to providing customers with easy access to the industry's best selection of top-quality roofing materials is reflected in its recent capital investments, including a newly-completed insulation super-plant in Washington and a new Polyiso manufacturing facility in New York. But we're not finished...ongoing capital investment projects in Illinois and Pennsylvania will make Carlisle's industry-leading TPO and PVC membranes even more readily available to customers throughout North America.

PVC Line Producing Material

WHERE:

Greenville, IL

PRODUCTS MANUFACTURED:

PVC single-ply membranes
(Standard, KEE, and FleeceBACK®)

SIZE:

396,000 square feet

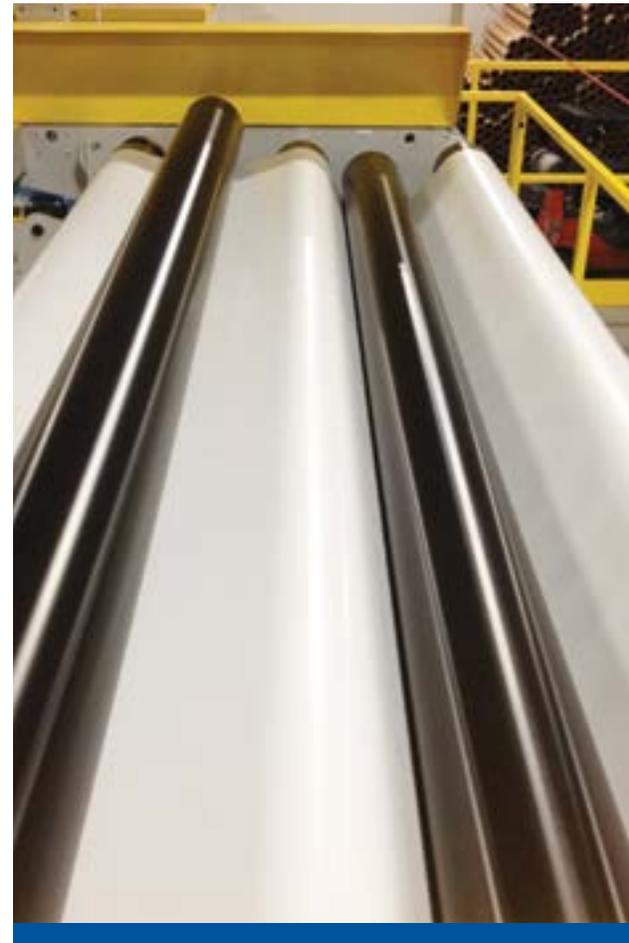

PRIMARY SHIPPING AREA:

North America

As of December 2013, Carlisle's state-of-the-art PVC manufacturing line is fully operational. Work on the line continued throughout the first quarter of 2014, when the plant officially started producing material.

In addition to producing standard PVC roofing membrane, the new manufacturing line will also make KEE-enhanced PVC, polyester- and fiberglass-reinforced PVC, and FleeceBACK PVC. Advanced manufacturing equipment and technology ensures that all of Carlisle's PVC membranes and accessories are compatible and meet the stringent quality tolerances required to be included in a Carlisle warranted roofing system.

With this new facility, Carlisle will provide the widest selection of PVC products on the market. The plant has already been evaluated by all of the required state, local and environmental institutions and has passed all codes. Carlisle's PVC line will operate efficiently and produce high-quality materials while also providing a safe working environment for employees.

Carlisle's PVC manufacturing line is fully operational and producing material.

Grand Opening Date Announced for PVC Line

Throughout the second quarter of 2014, Carlisle will be hosting a series of events at its PVC manufacturing line in Greenville, IL. Carlisle SynTec Systems will be holding its grand opening event and activities the week of April 28, 2014.

Carlisle has been invested in the Greenville, IL, area for more than 30 years with our existing EPDM manufacturing plant, which has provided numerous jobs and benefits to the local residents. The addition of the PVC manufacturing line will create additional jobs for the community and help to further develop the economy.

Progress Continues on Fifth TPO Line

WHERE:

Carlisle, PA

PRODUCTS MANUFACTURED:

TPO single-ply membranes

SIZE:

72,000 square feet

PRIMARY SHIPPING AREA:

Northeast U.S. and Canada

Site work continues on Carlisle's fifth TPO line.

Work has continued throughout the winter on Carlisle's new, cutting-edge, 72,000-square-foot TPO manufacturing line. The site work on this line, Carlisle's fifth TPO line overall, is nearly 50 percent complete. Once the site work is finished, advanced manufacturing equipment will be installed, enabling the line to produce a variety of sizes and thicknesses of Carlisle's industry leading TPO roofing membranes. Construction is on schedule and should be completed in the fourth quarter of 2014.
