

# CARLISLE'S AUTHORIZED APPLICATORS MARKETING ANNOUNCEMENT

**PVC-2014-16**  
CCM Greenville Product Codes  
January 8, 2015

**To: Carlisle SynTec Systems' Authorized Applicators**

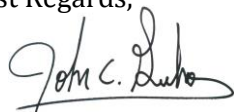

Carlisle SynTec Systems is changing the roll lengths and product codes for a number of its Greenville-produced PVC and KEE HP membranes. Product codes and roll lengths for PVC and KEE HP membranes **not** listed below will remain the same.

Existing Product Code	Existing Description and Size	FT <sup>2</sup> /Roll	New Product Code	New Description and Size	FT <sup>2</sup> /Roll
<b>.050 PVC</b>

318481	.060 REIN. WHITE KEE HP 5' X 80'	400	323480	.060 REIN. WHITE KEE HP 5' X 100'	500

Current product codes will be used and existing inventory will be shipped until stock is depleted. For aesthetic reasons, Greenville-produced PVC and KEE HP membranes should not be mixed with PVC and KEE HP membranes that were not produced in Greenville, as there is a sheen difference between those membranes. To minimize confusion, the new Greenville-produced PVC material will be stretch-wrapped in a purple-colored wrapping, and the new Greenville-produced KEE HP material will be stretch-wrapped in a platinum-colored wrapping.

If you have any questions, or for more information, please contact your local manufacturer's representative or distributor.

Best Regards,

John C. Greko  
PVC Product Manager
